
3: Consistent Project Structure

Overlap of git repositories, Rstudio projects and workflows

Kosmas Hench

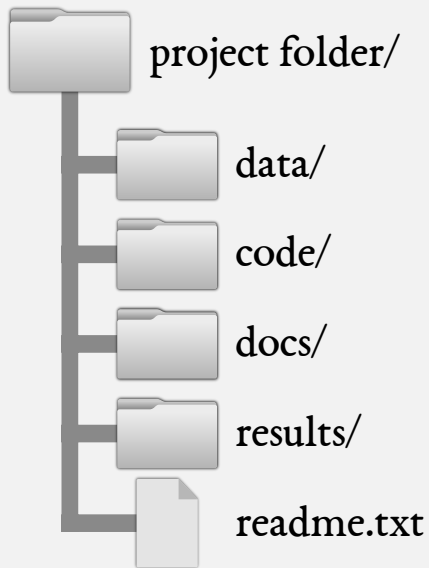

2025-05-27

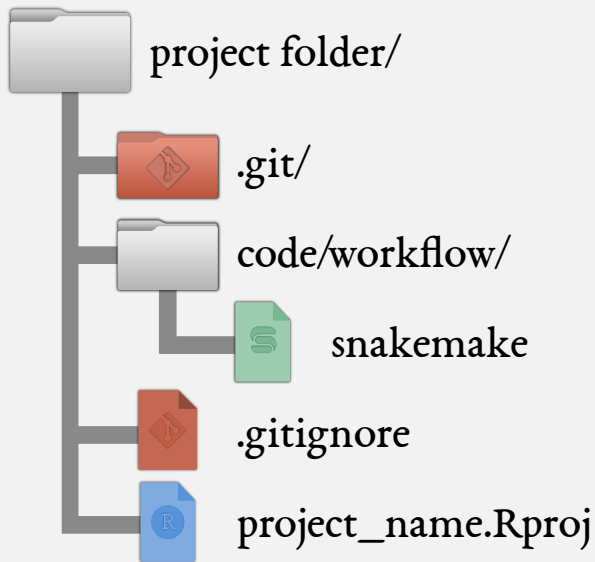

A close-up photograph of a person's hand reaching upwards towards a bright sun shining through a dense forest. The sun is positioned directly above the index and middle fingers, creating a strong lens flare. The background is filled with out-of-focus green foliage and tree trunks. On the palm of the hand, there is a small, vibrant rainbow. The text "all is ONE" is superimposed in white serif font across the center of the hand.

all is ONE

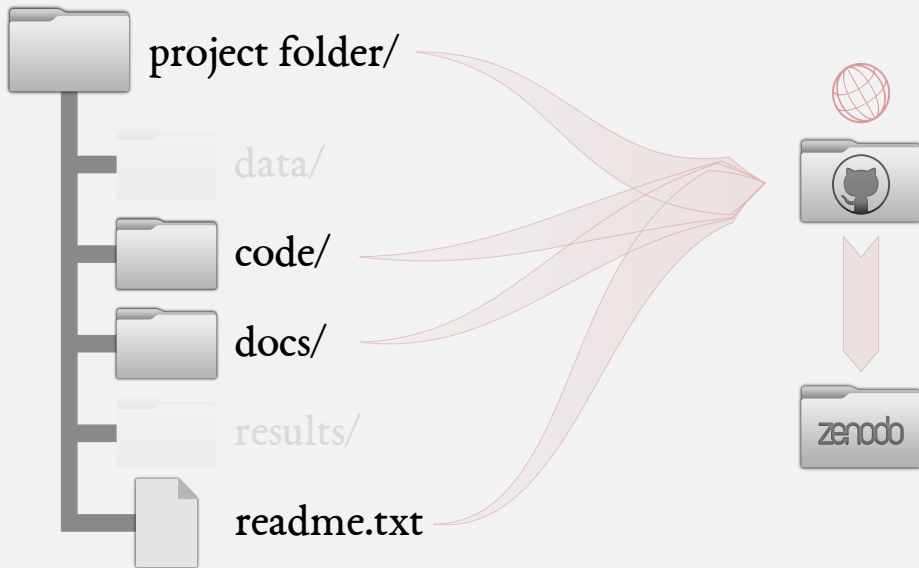

Image by Aarón Blanco Tejedor

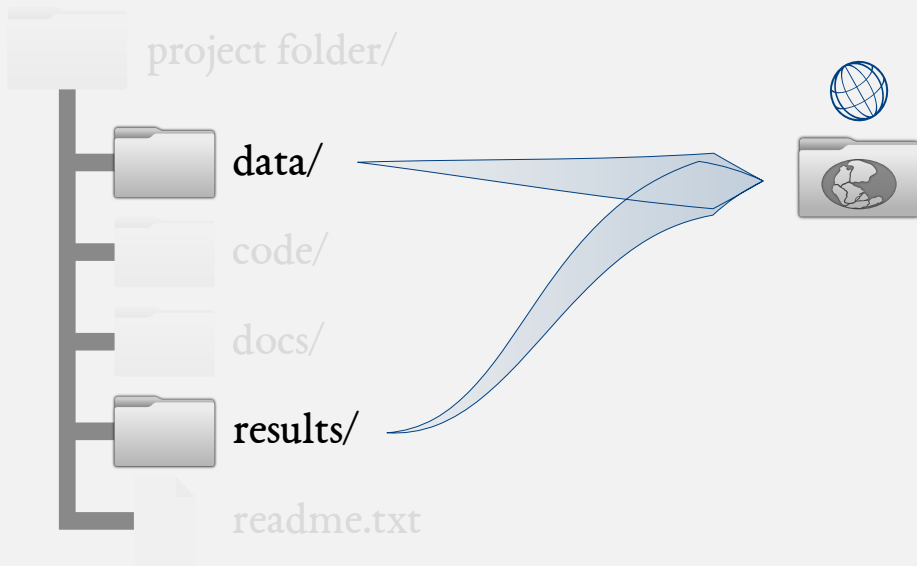

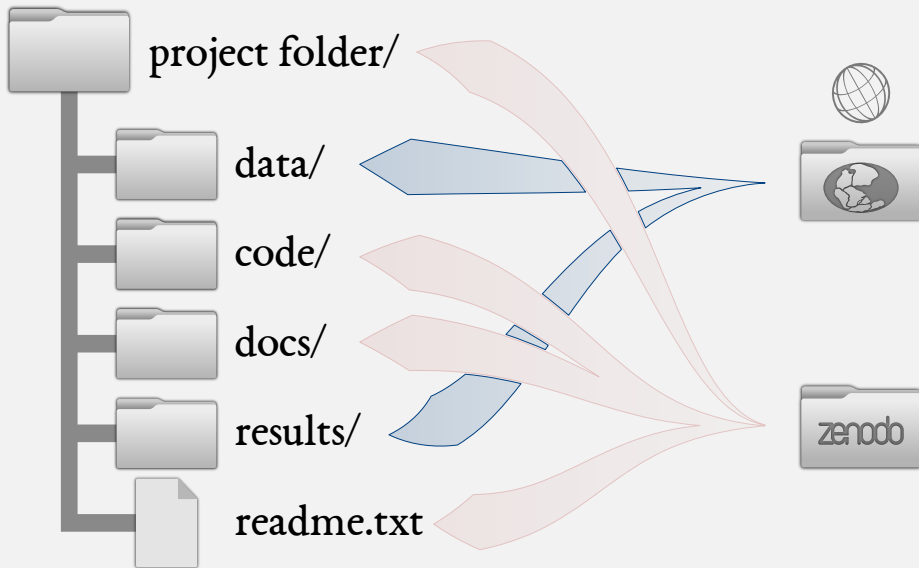

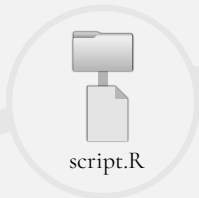

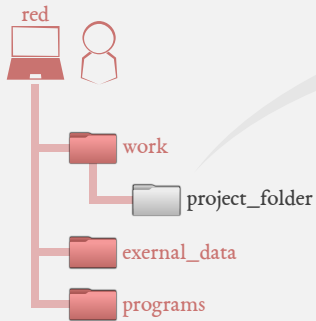

all is relative

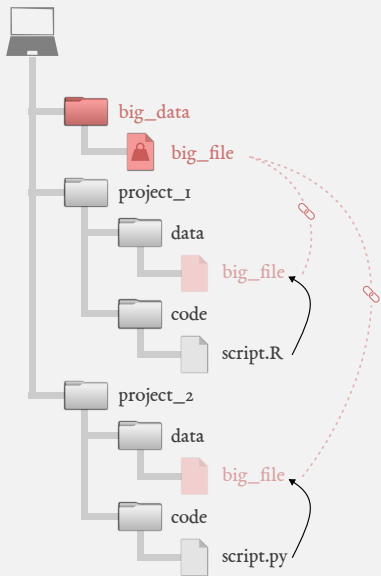

script.R

```
# to run script:  
# /red/programs/Rscript script.R
```

```
library(tidyverse)
```

```
data <- read_tsv("/red/external_data/table.tsv")
```

```
data_long <- data |>  
  filter(complete.cases(var1)) |>  
  pivot_longer(
```

👉 plz recycle your heavy data.
But no need to tell everyone
about it... 🙊
(code should stay within the project)
